

**Rowan Class: Trull History- we have been learning about how Trull has changed. When walking around the village, you could use these photos to talk about how places change.**

These are postcards of Trull Village from 1900-1920. Work out which part of the village you can see and visit where they are, and where the photographer stood. What similarities and differences can you see?

Can anybody take a photograph of the village today from one or more of these places to bring in and share with us?
